Trends in Aging and Future Projections

Source: Until 2010, "Population Census," Ministry of Internal Affairs and Communications, and from 2016 onward based on National Institute of Population and Social Security Research, Results of projection with medium-fertility assumptions/medium-mortality assumptions of "Population Projection for Japan (2017)."

Increase in the senior population
Diversification of insurance needs

Our Solution

Develop the top brand in the senior market by delivering the best products and services, which preempt the changes of the times, to households.

- In-house sales representatives work in pairs to make individual home visits, listen to customers' needs and provide the necessary coverage
- Promote triune sales of "strengthening of face-to-face services through visits," "product development which preempts the changes of the times," and "further enhancement of the in-house sales representative channel"
